Dull	Sunny intervals	Light rain showers	Light rain showers	Light rain	Sleet
Precipitation probability					
20%	20%	40%	40%	40%	20%

Forecast for Tuesday 27 Apr 2021

Weather: Some breaks in the cloud will develop during the morning and there will be a few brighter or sunny spells. Showers are likely to develop in the afternoon and any lasting into the late evening will turn to sleet or snow on the summits.

Chance of cloud free mountain/hill tops above 700m: 70%, early morning low cloud will lift and break, cloud lowering over the tops in showers later, more so in the east.

Visibility: Visibility will generally be good. As showers develop later the visibility will dip moderate or poor in any heavier showers. In showers cloud will fall to 6 or 700m for a time.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling very cold by evening with a wind chill developing in the strong northeasterly winds.

Forecast for Wednesday 28 Apr 2021

Weather: The cold northeasterly will continue with a lot of brighter weather but always a risk of a few showers especially in the morning, showers will be wintery above 700m, feeling very cold.

Maximum wind: Northeasterly 20mph gusts 30-35mph, perhaps stronger gusts around showers.

Chance of cloud free mountain/hill tops above 700m: 70% or more. Perhaps some low cloud lingering in the morning otherwise tops will generally be clear except in heavier wintery showers passing through.

Visibility: Visibility will generally be good or very good but will dip in any passing wintery showers. Showers should move through quite well on the northeasterly breeze.

Temperature: **Valleys:** Plus 4 rising to 9 Celsius.
At 700m: Zero Celsius.
Freezing level: 700m.
